

Stand out from your competition; expand your label space without expanding your product's packaging. Make an impact by adding Extended Content Labels (ECL).

Whitlam Group creates coupons, extended text and multipage booklet labels using a wide variety of formats and designs to suit virtually any container type. Capabilities include up to 12 colors, glossy or matte varnishing, transparent lamination, permanent adhesion to the container or pack, perforated or peel-off removable options, and a re-sealable ability, if required.

Apart from providing additional space for descriptive information, multipage solutions can incorporate barcodes, holograms and tamper-evident options. They can also be overprinted with batch numbers, sequential numbers, date or use-by information, and manufacturer codes or machine-readable data.

ECL Applications

- Instructions for use
- Environmental, health and safety precautions
- Storage and disposal information
- Conditions of sale or limitations of liability / warranty
- Multiple language labeling
- Dosage information
- Legal or regulatory standards
- On-pack promotions or coupons
- Cross selling of multiple products
