COVID-19 PREPAREDNESS AND RESPONSE PLAN

WHITLAM GROUP

1. General Guidelines and Policies

- a. **Policy Notification and Access.** This policy is being made readily available to employees via initial email communication and being posted on Whitlam's HR platform, Kronos, for ease and availability. This policy is also available on our organization's website www.whitlam.com in the "Quality and Sustainability" section for access by employees, customers and any other interested party.
- b. **Designation of Worksite Supervisors.** The following individuals have been designated as worksite supervisors under this plan. The duties of these supervisors are to monitor adherence to the plan and judge its effectiveness and feasibility:
 - i. Jim Dobiesz – Day Shift, Changeover and Unplanned Shifts
 - ii. Joe Dessert – Day Shift Backup
 - iii. Richard Davis – Night Shift
 - iv. Don Clifford – Additional Auditor
- c. **COVID-19 Training.** Training will be provided to all applicable employees. The following is a minimum of the topics to be covered:
 - i. Workplace infection control practices
 - ii. Proper use of applicable PPE
 - iii. The process to notify the organization of any COVID-19 symptoms or diagnosis
 - iv. The process for reporting unsafe working conditions
 - v. Routes by which the virus causing COVID-19 is transmitted from person to person
 - vi. Distance the virus can travel and remains visible in the air
- d. **Social Distancing and Masking Protocol.** Our Social Distancing protocols are consistent with current CDC guidelines. All employees should make every effort to generally and consistently maintain a minimum of 6 feet of space between them and any other employee. Whitlam Group encourages all employees to wear a mask, and especially where proper social distancing cannot be maintained.
- e. **Fully Vaccinated Individuals.** An individual is considered fully vaccinated two weeks after their 2nd shot in a two-part series (ex: Pfizer, Moderna), or two weeks after their first shot in a one-part series (ex: Johnson & Johnson). If an individual is 6 months or more beyond their 2nd shot in a two-part series, or 2 months or more beyond their 1st shot in a one-part series, then they must have their Booster to be considered Fully Vaccinated.
- f. **General Facility Cleaning Protocol.** The general daily cleaning/disinfecting of the facility, including common areas, is supported by contracted cleaning company. Primary focus is on common areas and high-touch areas including lunchroom, conference room, restrooms, door handles, etc.

- g. Availability of Cleaning Supplies, including Handwashing/Sanitizing Stations.** Whitlam has placed numerous cleaning stations throughout the facility. Many of these are marked by signage for easy identification. These stations include disinfectant, wipes, sanitizer, etc. to support personal hygiene and work area disinfecting. All employees with dedicated office/cubicle space are encouraged to clean/disinfect their respective areas, and keep clear of clutter to aid in proper cleaning.
- h. Public Transportation.** Should employees require the use of public transportation for either essential travel needs or daily access to and from work, we encourage the use of safe guidelines set forth by the CDC and other governmental agencies. These guidelines may include: the wearing of cloth face coverings, maintaining social distancing guidelines, washing hands thoroughly or using approved Hand Sanitizing products if soap and water are not available, and avoid touching their face.
- i. Infection Control Measures.** The purpose of this plan and subsequent protocols is to reduce the chance of exposure to COVID-19. Whitlam Group employees can greatly assist in this effort by following these guidelines in addition to the following methods:

 - i. Stay home if not feeling well** – This is CRITICAL to stopping the spread of the virus. Employees who do not feel well and/or are experiencing common symptoms of COVID-19, are asked to stay home, notify their Supervisor/Manager or Human Resources, and contact their doctors or medical professionals for further guidance. Human Resources will stay in touch with the employee to provide further guidance. See sections 2a and 2b for further guidelines on return to work procedures.
 - ii. General Housekeeping** – Although we have stepped up our efforts to disinfect and keep areas clean, we ask that everyone play their part. Utilize the different disinfecting stations to wipe down your work area, concentrate on the frequently used surfaces such as phones, mice, keyboards and other common areas. Keeping your areas neat and tidy will only aid in the ability of our cleaning staff to do a more thorough job during their rounds.
 - iii. Personal Hygiene** – Employees are reminded of the importance of personal hygiene. In addition to training, posters can be located throughout the facility on the techniques of proper handwashing, use of PPE, and other related topics.

2. Procedures for Reporting COVID-19 and Protocol for Suspected or Positive COVID-19 Diagnosis

a. Calculating Quarantine

- i. **Exposure to COVID-19, and not considered “Fully Vaccinated” (See Section 1e for definition of fully vaccinated):** The date of your exposure is considered Day 0. Stay home and Quarantine for at least 5 full days. Get tested no sooner than Day 5. You may return to work on Day 6 or after, assuming negative test. You are REQUIRED to wear a mask at all times for the remaining 5 days of your return. Please monitor for symptoms of COVID-19 during the entire 10 days, and isolate if you begin to experience symptoms. If you develop symptoms or test positive during this Quarantine period, the clock will start over at Day 0 and you will begin to follow Isolation Protocol. (See Section 2b for Isolation Protocol).
- ii. **Exposure to COVID-19 and “Fully Vaccinated” (See Section 1e for definition of fully vaccinated):** The date of your exposure is considered Day 0. You do not need to Quarantine unless you develop symptoms or receive a positive test. It is recommended you test no sooner than Day 5. Watch for symptoms until 10 Days following your exposure to a COVID-19 positive individual(s). You are REQUIRED to wear a mask at all times for the entire 10 days following exposure. If you develop symptoms or test positive during this Quarantine period, the clock will start over at Day 0 and you will begin to follow Isolation Protocol. (See Section 2b for Isolation Protocol).
- iii. **Exposed to COVID-19 and had Confirmed COVID-19 within last 90-days (results via a Viral Test):** The date of your exposure is considered Day 0. You do not need to Quarantine unless you develop symptoms or receive a positive test. It is recommended you test no sooner than Day 5. Watch for symptoms until 10 Days following your exposure to a COVID-19 positive individual(s). You are REQUIRED to wear a mask at all times for the entire 10 days following exposure. If you develop symptoms or test positive during this Quarantine period, the clock will start over at Day 0 and you will begin to follow Isolation Protocol. (See Section 2b for Isolation Protocol).

b. Calculating Isolation

- i. **If you tested Positive for COVID-19 or Have Symptoms (Regardless of Vaccination Status):** Following the confirmation to Human Resources of a positive COVID-19 diagnosis, employees will be immediately sent home (if not home already). The employee’s workstation will immediately be quarantined off and cleaning protocols will be initiated as outlined in Section 2d. Employees are asked to stay in communication with Human Resources, so we can ensure they are doing okay and to provide guidance on when it’s safe to return to work. At this time, Whitlam Group is following the guidelines for safe return set by the CDC. The date you tested positive for COVID-19, or the day symptoms started is Day 0. Stay home for at least 5 days. It is recommended that you isolate yourself from others, avoid travel and wear a well-fitting mask if you must leave.

whitlam.com

ii. Ending Isolation

- 1. Experienced Symptoms:** May end isolation after 5 days, assuming fever free for at least 24 hours without the aid of fever-reducing medication AND significant improvement in symptoms. You may return on the 6th day, but are REQUIRED to wear a mask at all times for the following 5 days
 - 2. Did not experience symptoms, but Positive test:** You may return to work on the 6th day, but are REQUIRED to wear a mask at all times for the following 5 days
 - 3. Severe COVID-19 Symptoms:** It is recommended that employees with severe COVID-19 symptoms isolate for the full 10 days. You may return to work on the 11th day, assuming you are fever free for at least 24 hours without the aid of fever-reducing medication, AND significant improvement in symptoms. It is recommended that employees follow up with their doctor before returning to work
- c. Close Contact of a Positive COVID-19 diagnosis Protocol.** Should an employee test positive for COVID-19, they will be asked, by Human Resources, if they believe there were any close contact concerns with any other Whitlam Group employees. Those individuals perceived to be in close contact with a COVID-19 positive employee will be notified, again by Human Resources, being given only as much information as required to allow for proper Quarantine or Isolation protocol to be enacted. Whitlam Group utilizes the CDC definition of close contact, which is defined as:
- i. Any employee who was within 6 feet of the individual for 15 minutes or more in a 24-hour timeframe, OR
 - ii. Was sneezed or coughed on by the COVID-19 positive employee, OR
 - iii. Is experiencing the common symptoms associated with COVID-19
- d. Confirmation of Positive COVID-19 Diagnosis Protocol – Cleaning.** In the event of a confirmed COVID-19 positive diagnosis, Whitlam Group will follow our 3C Protocol – Clear, Clean, Continue
- i. Clear and contain the area(s) that were occupied/used by the confirmed employee
 - ii. Clean and disinfect those areas using disinfecting materials consistent with CDC guidelines. This may include: sprays, wipes or even discharge bombs for larger areas
 - iii. Continue operations after review and approval by worksite supervisors for OKAY TO USE

Fax: (586) 757-1243
whitlam.com

- e. **Reporting of Unsafe Working Conditions.** Any employee who witnesses or suspects unsafe working conditions, are asked to immediately notify their Supervisor/Manager or Human Resources. Should an employee choose to notify their Supervisor/Manager, that Supervisor/Manager is asked to promptly contact Human Resource with the report. These reports will be investigated, and corrective actions put into place if applicable. Should an employee wish to remain anonymous, they can utilize the Employee Suggestion Box, located in the Employee Lunchroom. This Suggestion Box is monitored by Human Resources only and tracked accordingly.
- f. **Discipline.** Whitlam Group considers the health and safety of its employees to be Priority One. As a result, we believe communication on COVID-19 related items to be crucial to keeping the workforce safe. Employees who fail to report experiencing COVID-19 symptoms, a close contact situation and/or a positive COVID-19 diagnosis for themselves will be subject to disciplinary actions, up to and including suspension or termination.
- g. **Retaliation.** No employee who stays home because of posing a risk of infecting others shall be disciplined, retaliated against or discharged for such action.
